VERPAN

WORK

2

Disrupting the office space and re-imagining how we work.

Covid-19 has forced us to rethink many of our everyday functions, including how and where we work. This is our take on how you can create an inspiring and comfortable space that enables you to focus on work without compromising the feeling of home.

The Panton heritage.

Panton was a pioneer in terms of challenging the status quo. He was always experimenting with materials and new ways to approach product and spatial design.

His ability to bridge healthy ergonomics and purposeful functionality with imaginative and creative shapes was a constant in his experimental design process and still very much relevant today.

At Verpan, we continuously tap into this heritage when re-imagining products and solutions that help us solve modern challenges and rethink the ways we live, work and meet.

Living/ Working

Creating spaces and solutions within the home that can accommodate both personal and professional needs is one of the challenges we currently face.

Choosing the right furniture and lighting is essential in making this behavioral change a success.

Long-term seating comfort, great ergonomics and personal style are all essential factors, but also factors such as cleaning, durability and long-term value play in when making safe and sustainable investments in your home.

Cloverleaf sofa (Bestseller HQ, Aarhus)

Shared Spaces

As we are forced to rethink how we plan and execute meetings and gatherings in shared spaces, we know that future requirements will include an added focus on social distancing measures, health and safety, hygiene and a high level of flexibility and adaptability.

Meeting in smaller groups, meeting outside and creating new spatial infrastructures are possible first steps that are relatively easy to implement.

Cloverleaf sofa (Bestseller HQ, Aarhus)

CLOVER- LEAF

Cloverleaf Sofa

As good as it is for bringing people together, the Cloverleaf design can also – with a few clever touches – work as an effective tool for practicing safe social distancing.

With seating options on both sides and deep personal ‘pockets’ users can create their own space with safe distance to others limiting face-to-face interaction, effectively minimizing the risk of infection.

Upholstery

The upholstered Cloverleaf is available in a wide range of fabrics, including a selection of anti-bacterial vinyls that feature enhanced soil and stain resistance and antibacterial protection.

In- & Outdoor

The Cloverleaf In- & Outdoor version is made from 100% recyclable PE that is extremely durable, easy to clean and maintain. The Cloverleaf In- & Outdoor is FDA approved for use with food, UV and water resistant and can be placed both indoor and outdoor.

With the Cloverleaf In- & Outdoor, you have a great option to move work tasks outside - short meetings, phone calls etc. can all easily be performed outside.

Infrastructure

The modular nature of the Cloverleaf makes it a useful tool for disrupting the way we think and design spatial infrastructure.

Use it as a divider, transit zone, safe meeting space – the opportunities are endless.

Power

Both versions of the Cloverleaf sofa is available with integrated power outlet.

Nudging

Using clever nudging, by e.g. applying floor markings, you can easily guide users how to safely enjoy the Cloverleaf sofa.

A sound investment

With the Cloverleaf and Welle, you not only get super versatile, beautiful pieces of furniture, you also get original iconic Verner Panton designs.

The longevity of design allows you to plan beyond the current situation and look forward to a future with fewer restrictions.

The Cloverleaf In- & Outdoor integrated as part of the infrastructure of Danish Mall, Bruuns Galleri, Aarhus

Cloverleaf In- & Outdoor outside KPN Tower, Rotterdam

Corporate outdoor space, London (Project created by Day 2 Interiors Ltd & Lorenc Design Associates)

SUSTAIN- ABILITY

At Verpan we care about our social and environmental responsibilities.

We offer timeless design of high quality with long product life. Pantón's work continues to represent a high value, making a great case for resale or donation of product at end-of-use.

We introduce recyclable materials when possible and strive to develop products for easy assembly and disassembly - making it possible to replace and ultimately dispose damaged parts properly.

We work closely with our suppliers and logistics partners to ensure optimal production methods and minimize shipping and packaging.

Recyclable.

The Cloverleaf In- & Outdoor Sofa is a great example of how our efforts materialize in real life. The sofa is extremely durable and made from 100% recyclable rotational molded PE polyethylen, meaning that at end-of-life, the material can be granulated and reused.

The sofa is modular and damaged parts can easily be replaced and ultimately disposed of properly.

49

Construction.

In addition to the seat and back being manufactured in 100% recyclable polypropylene (PP), the Flex chair is assembled with standard screws, making it possible to disassemble the chair to replace parts and extend the product's lifecycle and ultimately dispose of parts in an environmentally friendly manner.
